

**Perky's
HELP**

Electronic Journaling

Journaling is the regular practice of recording thoughts, feelings, experiences, and observations. It serves as a personal, judgement-free space to translate intangible ideas into concrete words. It provides an opportunity to identify patterns, celebrate progress, process difficulties, and maintain focus on what is important.

The regular moments of reflection involved with journaling can help users build resilience, strengthen emotional awareness, and develop a greater sense of control and direction. This underpins positive changes that contribute to longterm growth and self-management.

Through simple, consistent iPad-journaling, users can build clarity, confidence, and resilience, supporting a more balanced, purposeful, and self-directed life.

carrying away small stones.”**
